It embodies one of the most important measures of the session, much of which is necessarily unwisely applied and foolishly spent. Yet all Industrial House, on the plan of that of New Haven, would not ous in pressing upon members and outsiders the only prevent a pecuniary waste, but realty help recessity of doing something with this troublesome and threatning question. No plan that the most ingenious man alive could devise would be satisfactory to all; hence amendments mane beart will say, let the unffering and sick be relieved. But what aid so effectual, what relief so thorough, as that relief which finds employment for them, and gives thereby moral may be looked for; still, if the bill passes at all, it will undoubtedly go through nearly in its present shape. Your correspondent has not much hope that it or any other effective measure will be adopted. The opposing interests are very large, and, if those who hold them wield the power in their hands, they can make themselves injuriously felt. Profitable franchises backed up by six millions of dollars, are dangerous opponents for a legislative body to se the nufortunate, when able, would carn ir bread. We commend this subject most nestly to the consideration of our citizens. A more was made, also, in the House towards a new apportionment law under the Census of 1855. It need age surprise any one that the public will most employed any one that the public will most employed any impeding sis ourrent, for the repetation of the Illinois valley for health is not too favorable at best. It is also a question whether there is a sufficient supply of water in the bot season to cause a rise of five feet over the bars, and supply the increased evaporation. It looks very much like spreading out what little there is to dry.

The average width of the river below La Salle, inchaining Peeria Lake, is probably eight hundred or one thousand feet. With six wells, ince water in several places will not be more than one and a half or two feet deep. To raise the water to five feet deep, the average without the water to five feet deep. Mr. Orr said—I think this debate is an onnecessary consumption of time. Charges of a similar character have been so requently under relative to members of Congress, that I think the whole of them should now be investigated. I do not less how this House, consistently with its dignity and self respect, can refuse an investigation, after the statement of the gentleman from North Carolina. It is due to the character of this body and to our constituents, that the inquiry should be a broad as possible.
